

BluOS 2.16.1

The latest BluOS software, version 2.16.1, includes a large number of under-the-hood fixes and performance enhancements that make listening music around the home better than ever before. A newly polished app interface, auto-wake and input selection for BluOS enabled devices, app switching for the BluOS Controller and NAD Remote apps, and IP control for NAD products, have all been added for improved integration and functionality.

Software Requirements

BluOS Controller for iOS, version 2.16.0 or higher

BluOS Controller for Android and Kindle Fire, version 2.16.0 or higher.

BluOS Controller for Mac OS, version 2.14.0 or higher.

BluOS Controller for Windows PC, version 2.14.0 or higher.
